

Hatice Kübra Bayraktar – 18050111010

We will see that how CBC and ECB works and their differences in this assignment.

To run the code we need Python 3+ installed.

First you should open the project file.

### **Install required packages**

```
pip3 install -r Requirements.txt
```

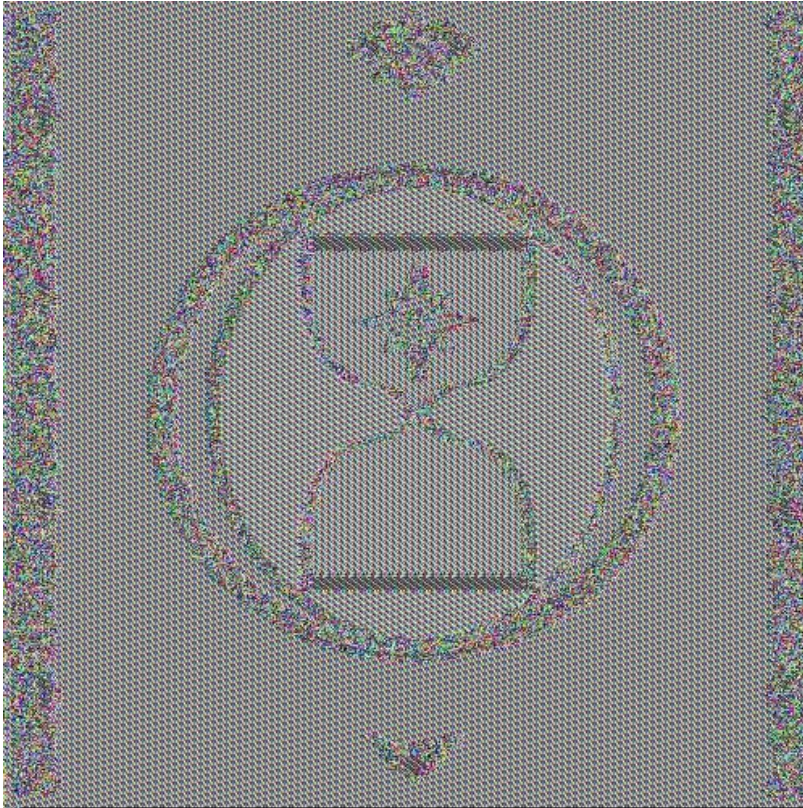

### **To run ecb\_mode.py in terminal**

```
python ecb_mode.py
```

Our grayscaled image below.

## ECB Mode Encryption

**To run cbc\_mode.py in terminal**

```
python cbc_mode.py
```

## **CBC Mode Encryption**
